

élégante

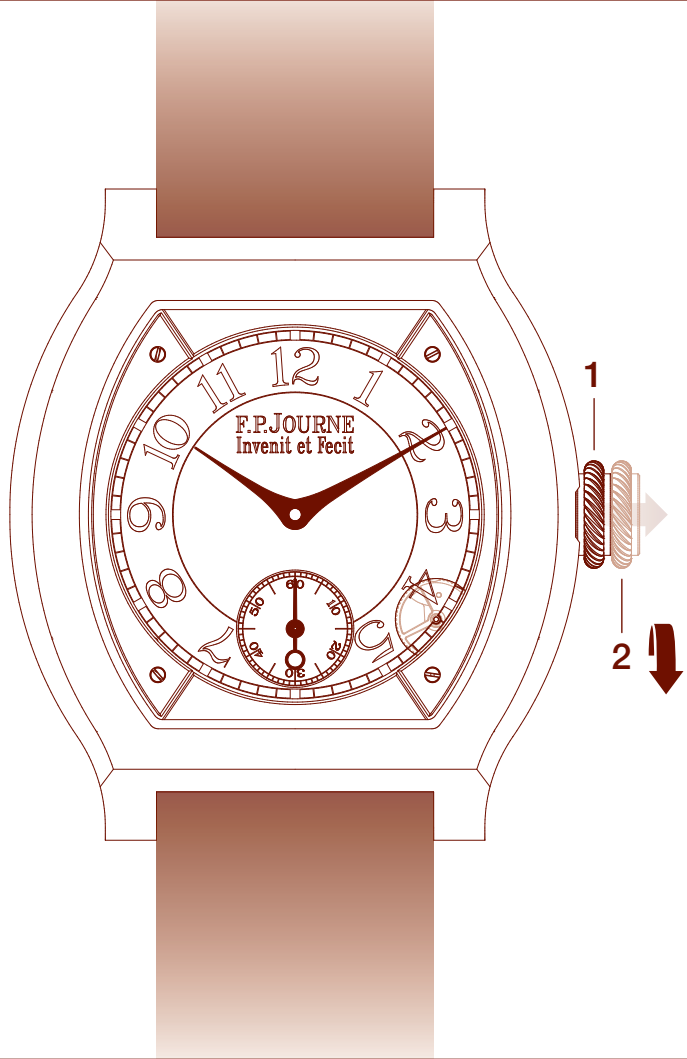

Use

Setting the time_

When pulling the crown in position **2**, the movement will stop.

In position **2**, turn the crown counter-clockwise to set the time.

Return the crown to the initial position **1** for the movement to start again.

- 2 Superluminova inner dial.
- 3 Blued hands.
- 4 Inertia-block, motion sensor.
- 5 Rubber overmold.

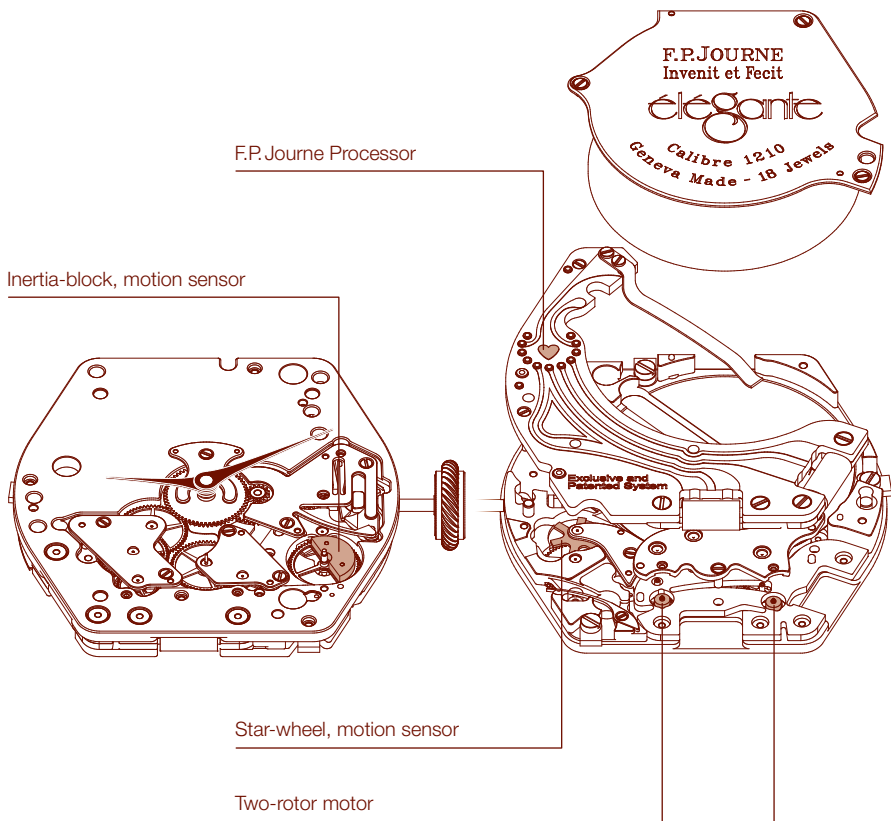

Characteristics

Standby mode_

Your watch goes into standby mode after 30 minutes when not being worn (the inner mechanisms stop to save energy and extend the battery life). The hands will stop turning and the displayed time freezes.

Your watch rapidly reset to the exact time when moved. Time resetting is triggered by the motion sensor of the watch which restarts the mechanisms to display again the exact time.

Specifications
